A single product for the entire body.

**Deep facial cleansing, skin moisturizing & nurturing, revitalizing shampoo, rich lather for shaving.
Hypoallergenic, antioxidant.**

Why buy from us?

1. **Extra virgin olive oil** has up to 83% oleic acid in its composition which is perfectly penetrating the outermost layer of the skin. It also contains antioxidants like polyphenols, vitamin E, A, K, D and B complex, Squalene (also used in cosmetics) and other nutrients. It is 100% natural, non-toxic and hypoallergenic. The oleic acid will go deep in the epidermis and take with it all the necessary elements to heal the damages, to improve skin tissue and color, to reduce lines and wrinkles. Olive oil will offer sun protection and will reduce skin cancer risk. And much more.
2. **Traditional old Greek recipe:** This soap is made by the descendants of olive plantation owners from south Peloponnesus, involved in soap making for centuries who use the best quality extra virgin olive oil from the oldest growing area of Greece.
3. **Handmade product:** 100 % handmade, hand cut and hand wrapped.
4. **Cold method:** No boiling. This way, the nutritive elements of the oils remain in the soap and all the natural glycerin is retained also. Big industries use the "hot method" and boil their soaps because this allows them to produce huge amounts of soaps and, most importantly, they can separate the soap's glycerin and then sell it separately for extra profit.
5. **0% caustic soda left:** the laboratory analysis of this soap show that there is no caustic soda left after the saponification which makes the soap suitable and for babies and does not irritate the skin.
6. **Extra virgin olive oil at a rate of 105%:** this means the 5 % more olive oil is used than the amount necessary to produce the soap. This extra 5% of extra virgin olive oil treats the skin very tenderly and nourishes it as it being deeply cleansed. It does not stain or give oily effect. The olive oil is completely absorbed into the epidermis and leaves you with simply smooth, supple skin.
