iuStar200 **Expert**

iustar200Expert is tailored for doctors who dream of advanced color Doppler ultrasound system but constrained by low budget. The system is designed to be affordable but without any compromise in performance. United Imaging Healthcare migrates its achievements in premium ultrasound platforms to iustar200Expert, such as Adaptive Speckle Reduction (UniView™), Spatial Compound Imaging (UniCT™), Pulse Inversion THI, etc. All of these ensure exceptional performance of iuStar200Expert in various clinical applications.

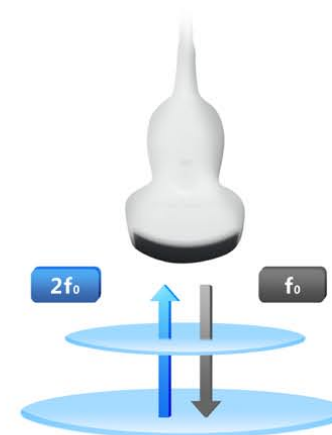

Technology **EX**ceeds Value Limits

With the philosophy 'to share our R&D achievement with customers', United Imaging Healthcare has integrated excessive advanced imaging technology in one economic machine.

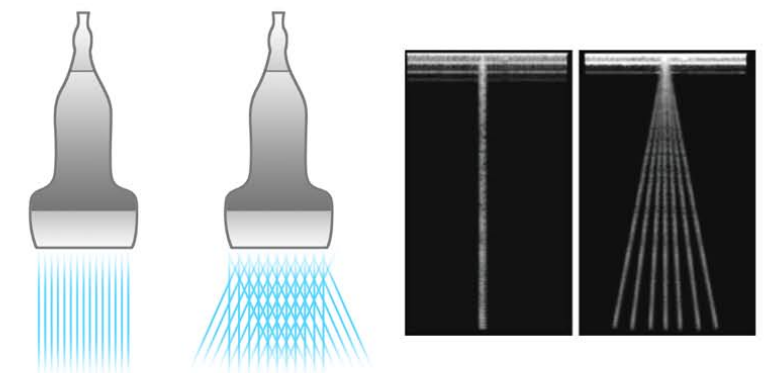

iuStar200Expert gives doctors increased diagnostic confidence and improved patient care.

UniView™(Adaptive Speckle Reduction)
eliminates noise while maintaining true tissue architecture

Pulse Inversion THI
provides higher spatial resolution and deeper penetration

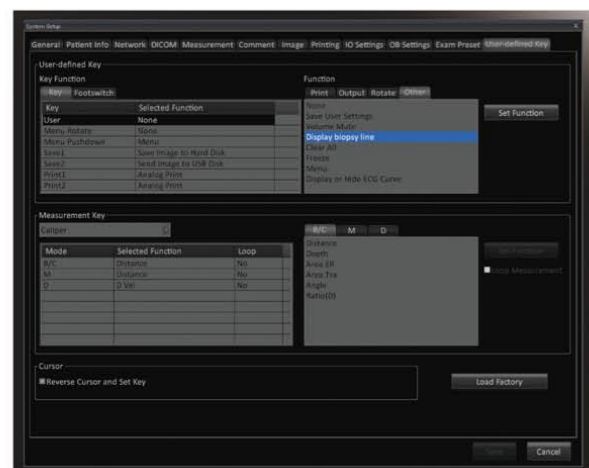

UniCT™(Spatial Compound Imaging)
enhances tissue interfaces and border differentiation

Extremely Easy Workflow

iCentre

an easy navigation of the integrated workstation allows you to store, recall and manage patient data with speed and efficiency

Full User-Customization

User-defined key and User-defined OB Table/ Formula

iuScan(One-key Optimization)

Automatically adjusts multiple parameters in 2D and Doppler modes

PSI (Patient Specific Imaging)

a great workflow enhancer comparing with the traditional exam change between normal/difficult patient scanning

Menu Express

so that the items you use most often are never more than one layer deep

Thumbnail Image Display

provides easy access to stored images for review, printing and transfer

Auto Trace

automatic Doppler analysis

Full DICOM Capabilities

to enhance patient throughput and information exchange

An **EX**pert in Wide Applications

iuStar200Expert performs well across a broad range of clinical applications. Specialized transducers, exceptional image quality, convenient workflow tools and tailored report packages make iustar200Expert a reliable partner from general Imaging, OB/GYN to a wide application range.

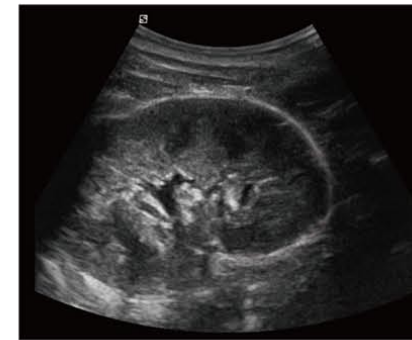

Most Easy 1-2-3- step 4D Scanning

iuStar200Expert gives you affordable access to high-quality 4D imaging. The most ease 1-2-3 step way of operation makes 3D/4D capture enjoyable than ever before.
