

Dezvoltare parcuri eoliene si fotovoltaice

In etapele dezvoltarii unor proiecte pentru parcuri eoliene sau fotovoltaice sunt necesare: masuratori topografice, studii geotehnice, investigatii geofizice. Noi realizam toate aceste servicii si va putem oferim cele mai avantajoase conditii.

Investigatii geofizice:

- Profile seismice 2 D
- Masuratori seismice MASW 1D si 2D
- Sondaje Electrice Verticale (SEV)
- Profile geoelectrice 2D

Station	Depth (m)	Soil Type	Notes
1	0-1	Clay

1	97-98	Sand	
1	98-99	Clay	
1	99-100	Sand	

Studii geotehnice:

- foraje geotehnice
- teste de penetrare dinamica
- teste cu placa
- prelevare de probe
- analize de laborator
- intocmire si avizare documentatie

Masuratori topografice:

- modelare 3D suprafete extinse
- masuratori GPS
- planuri de situatie complexe
- trasare drumuri de acces
- trasare si verificare virole
- trasare si verticalizare stalpi
