3.1 Coils characteristics

Insulation class	DHI pilot	H (180°C)	Due to the occuring surface temperatures of the solenoid coils, the European standards EN ISO 13732-1				
	DHE pilot	H (180°C) for DC coils F (155°C) for AC coils	and EN ISO 4413 must be taken into account				
Protection degree to DIN	EN 60529	IP 65 (with connectors 666, 667, 669 or E-SD correctly assembled)					
Relative duty factor	r 100%						
Supply voltage and frequ	ency	See electric feature					
Supply voltage tolerance		± 10%					
Certification		cURus North American standard					

Flow rate [l/min] Note: for AGIU-20, the max flow rate is 200 l/min

Flow rate [l/min] Note: for AGIU-32, the max flow rate is 300 l/min

NOTES

- Short pipes with low resistance must be used between the unloading valve and the accumulator;
- When the resistance is high, the hydraulic pilot signal must be taken as closed as possible to the accumulator;
- With high pump flow and small valve differential pressure of intervention it is unadvisable to use the version with external drain;
- 4)When to use the BA-*25 subplates:
 - a) in applications with working frequencies
 >10 Hz use subplates type BA-*25/4 (spring with 4 bar of cracking pressure);
 - b) in applications with working frequencies
 <10 Hz use subplates type BA-*25/2 (spring with 2 bar of cracking pressure);

6 ELECTRIC CONNECTORS ACCORDING TO DIN 43650 FOR AGIU WITH SOLENOID VALVE

The connectors must be ordered separately

Code of connector	Function					
666 Connector IP-65, suitable for direct connection to electric supply source						
667	As 666 connector IP-65 but with built-in signal led, suitable for direct connection to electric supply source					

For other available connectors, see tab. E010 and K500

(1) For other supply voltages available on request see technical tables E010, E015.

(2) Coil can be supplied also with 60 Hz of voltage frequency: in this case the performances are reduced by 10 ÷ 15% and the power consumption is 55 VA (DHI) and 58 VA

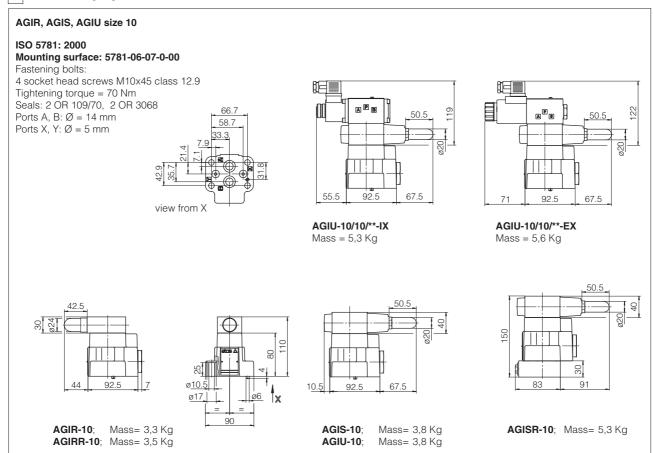

(3) Average values based on tests performed at nominal hydraulic condition and ambient/coil temperature of 20°C.

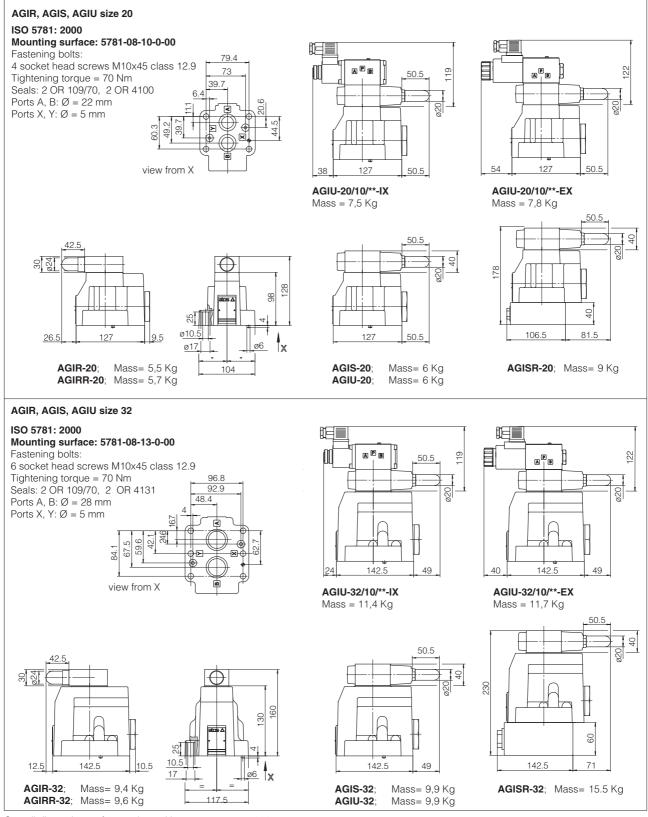

(4) When solenoid is energized, the inrush current is approx 3 times the holding current.

(5) Only for DHE

(6) Only for DHI
