Construction

Single inlet centrifugal fan with forward curved impellers manufactured in galvanized steel sheet. Casing in galvanized steel sheet.

Motor

230V, 50Hz single-phase asynchronous external rotor motor with built-in automatic thermal protection overload switch. Enclosure IP 44, insulation class B.

Wiring diagram, see page 236.

Construction

Double inlet radial fan. Impellers with forward curved blades in galvanized steel sheet.

Motor

220–240V, 50Hz single-phase external rotor motor with capacitor, suitable for variable speed control. Enclosure IP44, insulation class B. Special voltage or frequency, insulation class and enclosure, may be supplied on request.

Wiring diagram, see page 236.

Construction

Double inlet centrifugal fan. Forward curved impellers manufactured in galvanized steel sheet. Casing in galvanized steel sheet with easy dismountable motor brackets.

Motor

220–240V, 50Hz single-phase asynchronous motor with capacitor, resp. 220–240/380–420V, 50Hz three-phase asynchronous motor. Enclosure IP10, insulation class B, built-in thermal overload protection. Special voltage or frequency, insulation class and enclosure may be supplied on request.

Construction

Single inlet direct driven centrifugal fan with spiral formed casing of stainless acid proof steel. Impeller with forward curved blades of stainless acid proof steel. Temperature barrier allows max. temperature of 180°C.

Motor

220-240/380-420V, 50Hz (380-420/660-690V over 3kW) three-phase asynchronous motor or 220-240V, 50Hz single-phase asynchronous motor with capacitor, in accordance with IEC72 and IEC43-1. Insulation class F, enclosure IP55. Special voltage or frequency, improved enclosure IP65 and explosion proof motor may be supplied on request.

Wiring diagram, see page 235.

Fan with motor stand

Performance curves

GRF-2

GRF-4

Construction

Single inlet direct driven centrifugal fan with spiral formed casing in cast aluminium. Impellers with forward curved blades type F in galvanized steel sheet. GSFG is as standard delivered with LG design and wire guard on inlet.

Motor

220-240/380-420V, 50Hz (380-420/660-690V above 3kW) three-phase or 220-240V, 50Hz single-phase asynchronous motor with squirrel cage rotor. Enclosure IP55, insulation class F. Special voltage or frequency, insulation class, improved enclosure IP65, 2-speed motors and explosion proof motor can be supplied on request.

Wiring diagram, see page 235.

GMT-100 with support type F

GMT-100 complete with support type M

Construction

Single inlet, direct driven centrifugal fan. Impeller with self-cleaning blades of cast aluminium in one piece, balanced according to ISO 1940.

Casing of sheet steel welded and painted with blue powder coat. Inlet and outlet guard as a standard for GMT-60, 80, 100, 130. Outlet guard as a standard for GMT-200, 300, 500. Impellers in steel, cast iron or brass as well as casings of galvanized or acid-proof steel can be supplied on request.

GMT-100E fan can be supplied with a support type M, an external overload protection, and a 5m cable and a plug.

Motor

220-240/380-420V, 50Hz (380-420/660-690V over 3kW) three-phase or 220-240V, 50Hz single-phase asynchronous motor with squirrel cage rotor, in accordance with IEC72 and IEC34-1. Insulation class F, enclosure IP55. Special voltage or frequency, improved enclosure IP65, 2-speed motors, explosion proof motor can be supplied on request.

Wiring diagram, see page 235.

Accessories

Support type M for module mounting, support type F for wall mounting, suitable for GMT-100 and GMT-130. Connectors and shutters for inlet and outlet side.

Accessories

Protection guard outlet

Connector outlet

Protection guard inlet

Construction

Single inlet direct driven centrifugal fan with spiral formed casing in steel sheet, welded and powder coated RAL9002. Impeller with backward curved (type GSB), or backward straight self-cleaning blades (type MSB), in aluminium or in steel sheet. Casing and impellers in other materials for example stainless steel or galvanized steel sheet may be supplied on request.

Motor

220-240/380-420V, 50Hz (380-420/660-690V over 3kW) three-phase or 220-240V, 50Hz single-phase asynchronous motor with squirrel cage rotor. Enclosure IP55, insulation class F. Special voltage or frequency, improved enclosure IP65, 2-speed motors, explosion proof motor can be supplied on request.

Wiring diagram, see page 235.

Accessories

Inlet and outlet fittings, wire guards, dampers, etc.

Performance curves

Construction

Single inlet centrifugal fan with spiral formed casing, impeller with self cleaning blades.

Fan GST-2-180/00 has impeller and casing of stainless acid proof steel and temperature barrier which allows max. temperature 150°C.

Motor

220-240/380-420V, 50Hz (380-420/660-690V above 3kW) three-phase asynchronous motor. Enclosure IP55, insulation class F. Special voltage or frequency, improved enclosure IP65 and explosion proof motor can be supplied on request.

Wiring diagram, see page 235.

Accessories

Inlet and outlet fittings, wire guard, etc.

GST-2-180/00

Construction

Radial bladed impeller of steel sheet riveted and welded construction, dynamically balanced. The casing comprises two sheet steel pressings bolted together to enclose the impeller. The motor pedestal has a pressed steel front plate to which the casing is bolted at the desired angle. The fan is designed for non-aggressive and non-explosive gases. Design for corrosive gases, higher running temperatures, etc. can be supplied on request.

Motor

230/400V, 50Hz (400/690V, 50Hz) three-phase asynchronous motor, suitable for speed control with frequency control. Insulation class F, enclosure IP55. Special voltage or frequency, improved enclosure IP65, 2-speed motors and explosion proof motors can be supplied on request. Wiring diagram, see page 235.

Accessories

Inlet flanges, filter and silencers.

Performance curves

Construction

Radial bladed impeller of steel sheet riveted and welded construction, dynamically balanced. Casing of heavy sheet steel welded construction, stiffened with angle section and having an integrated motor pedestal. Design for corrosive gases, higher running temperatures, belt drive, etc. can be supplied on request.

Motor

230/400V, 50Hz (400/690V, 50Hz) three-phase asynchronous motor, suitable for speed control with frequency control. Insulation class F, enclosure IP55. Special voltage or frequency, improved enclosure IP65, 2-speed motors and explosion proof motors can be supplied on request. Wiring diagram, see page 235.

Accessories

Inlet flanges, inlet filter, silencer and inlet guards.

Construction

Single inlet centrifugal fan. Two radial bladed impellers riveted of steel sheet with a turned mild steel hub, fitted to the motor shaft. Twin casing in steel plate of welded construction adequately stiffened to prevent drumming and vibration. Access to the impeller is given by removing the bolted cover of the casing inlet side. Designed for transportation of normal air with max. temperature of +80°C. Designs for corrosive gases, higher running temperatures, etc. can be supplied on request.

Motor

230/400V, 50Hz (400/690V, 50Hz) three-phase asynchronous motor, suitable for speed control with frequency control. Insulation class F, enclosure IP55. Special voltage or frequency, improved enclosure IP65, 2-speed motors and explosion proof motors can be supplied on request.

Wiring diagram, see page 235.

Working area: pressure up to 35000 Pa
flow up to 3400 m³/h.

Accessories

Inlet flanges, inlet filter, silencer.

Construction

Single inlet direct driven two stage centrifugal fan with casing in steel sheet, welded and powder coated. Impellers are made of aluminium sheet, dynamically balanced according to ISO 1940.

Motor

400/690V, 50Hz three-phase asynchronous motor with squirrel cage rotor. Enclosure IP55, insulation class F. Special voltage or frequency, improved enclosure IP65, explosion proof motor can be supplied on request.

Wiring diagram, see page 235.

Performance curves

**FCM****Construction FCM**

Single inlet direct driven centrifugal fan with casing in welded steel sheet. Impeller, type F, with forward curved blades in steel sheet, suitable for clean air. Very silent. Casing and impeller in other materials for example stainless steel or galvanized steel sheet may be supplied on request.

Working range:

Flow 0 - 60 m³/s

Pressure 0 - 1 kPa

Motor

380/420V, 50Hz three-phase asynchronous motor IEC34-1. Enclosure IP55, class F insulation. Special voltage or frequency, or enclosure may be supplied on request.

Wiring diagram, see page 235.

Accessories

Inlet and outlet fittings, silencer, sleeve.

**RL****Construction RL**

Single inlet direct driven centrifugal fan with casing in welded steel sheet. Impeller with straight radial blades in steel sheet, suitable for clean air at high pressure. Casing and impeller in other materials for example stainless steel or galvanized steel sheet may be supplied on request.

Motor

380/420V, 50Hz three-phase asynchronous motor IEC34-1. Enclosure IP55, class F insulation. Special voltage or frequency, or enclosure may be supplied on request.

Wiring diagram, see page 235.

Accessories

Inlet and outlet fittings, silencer, sleeve.

Type	Flow m ³ /s	Pressure kPa
RL0	0,5-6	20
RL1	0,1-18	20

**PB**

Construction

Single inlet, direct or belt driven centrifugal fan with casing in welded steel sheet. Impeller with straight self-cleaning radial blades in steel sheet, suitable for air with solid particles. Casing and impeller in other materials for example stainless steel or galvanized steel sheet may be supplied on request.

Motor

380/420V, 50Hz three-phase asynchronous motor IEC34-1. Enclosure IP55, class F insulation. Special voltage or frequency, or enclosure may be supplied on request.

Wiring diagram, see page 235.

Accessories

Inlet and outlet fittings, silencer, sleeve.

**PH**

Type	Flow m ³ /s	Pressure kPa
PB1	0,1-12	4
PB2	0,2-24	3
PB3	0,3-25	2
PH1	0,2-25	20
PH2	0,4-40	20

**BL**

Construction

Single inlet, high-pressure direct-driven (type BL), or belt-driven (type BNF) centrifugal fan with casing in welded steel sheet. Impeller with backward curved blades in steel sheet, suitable for clean or lightly polluted air. Suitable in applications with high efficiency. Casing and impeller in other materials for example stainless steel or galvanized steel sheet may be supplied on request.

Motor

380/420V, 50Hz three-phase asynchronous motor IEC34-1. Enclosure IP55, class F insulation. Special voltage or frequency, or enclosure may be supplied on request.

Wiring diagram, see page 235.

Accessories

Inlet and outlet fittings, silencer, sleeve.

**BNF**

Type	Flow m ³ /s	Pressure kPa
BLT	0,3-10	20
BLV	1-100	20
BLX	2-150	20
BLZ	3-200	20
BLN	1-300	6
BLW	1-400	3
BFN	1-300	6

Construction

Single inlet, belt driven centrifugal fan with casing in cast aluminium and impeller with backward curved blades in aluminium sheet. The suspension of the belt-drive and the unique design of the casing give optimal compactness. Casing and impeller in other materials for example stainless steel or galvanized steel sheet may be supplied on request.

Motor

220-240/380-420V, 50Hz (380-420/660-720V above 3kW) three-phase or 220-240V, 50Hz single-phase asynchronous motor with capacitor. Insulation class F, enclosure IP55. Special voltage or frequency, improved enclosure IP65, 2-speed motors and explosion proof motors can be supplied on request.

Wiring diagram, see page 235.
