Product Introduction

X-431 DIAGUN III

Introduction

The X-431 Diagon III is the newest specially designed diagnostic tool for automotive technicians. Compact main unit, powerful diagnostic functions, fast and convenient update make it the first choice. The X-431 Diagon III can be connected to external printer through USB port to print the diagnostic result in real time and support the large capacity TF card to store the diagnostic results.

Functions

The X-431 Diagun III inherits the diagnostic functions of X-431 series (the diagnostic tools with most model software developed at present). It can support mainstream vehicles like Benz, BMW, Ford, VW, Nissan, Hyundai etc. and more than 90% of European, American and Asian brands (220 manufactures, 2500 models). Besides there are nearly 1.000 times of updates per year to synchronize with the latest international models. **One year free-update!**
