## Application area

For the regular cleaning of lacquered surfaces or for surfaces treated with Lacquer Care.

## Application

Lacquer Soap may be applied manually with a mop or a floorcloth or with a polishing machine.

# How to do...

- WOCA Lacquer Soap:  
Regular cleaning of lacquered surfaces

## Tools

Bucket, floorcloth or swep-mop.  
Clean tools with water and soap.

## Please notice!

Particularly dirty floors or stubborn stains may be removed with Wood Cleaner or Spot Remover.

Lacquer Soap is used for regular cleaning of lacquered or painted surfaces and for surfaces of vinyl, floor tiles, linoleum, laminate etc. Lacquer Soap does not build a soap film and is therefore ideal for surfaces requiring frequent cleaning.

### 1 Cleaning

Mix 125 ml Lacquer Soap with 5 l water for the regular cleaning. Wash the floor lengthwise. It is recommendable to work with two buckets - one with rinse water for the wringing out of the mop and another one with the soap solution.

It is recommendable to use as little water as possible for the cleaning and make sure that no water is left on the surface after cleaning.
