Losing data can have disastrous consequences for your profession or business. We can help you recover your data. Also we can offer solutions, if you wish, to avoid future data loss by implementing a proper data backup policy to save you precious time and money.

If you lost critical data due to:

- **Accidental file deletion**
- **Computer viruses**
- **Damage due to a power failure or power surge**
- **Software program failures**
- **Corrupt or missing critical file system structures**
- **Partitioning or boot-up problems**
- **Drives that have been fdisked or formatted**

Lost your data?

We can help you recover your lost data quickly and easily using our Professional Data Recovery service.

Data security and data integrity can be of prime importance to your profession or business.

- **We can secure your computer network or email server against any virus attacks or intrusions from the outside. We can set up and configure firewalls, anti-virus software or tweak your existing software to close security holes in your operating system.**
- **We can identify your company network vulnerabilities and implement proper standard security audits and offer solutions based on your specific needs**
- **We offer small businesses various security packages which include data backup and storage solutions as well. For details, call us on +447848385009, +447407068442 or email us at customer@comland-design.eu**

Just got a new PC? Need some help setting it up?

It doesn't matter where you bought your PC - give us a call and we'll help with connecting it all up, getting you online and (if necessary) transferring all of your files and settings from the old computer.

Whether it's a major motherboard and processor change or just a quick memory upgrade, look no further. We can help advise on what and where to purchase as well as fitting and testing your new hardware.

Our rates are very competitive in comparison with High Street computer shop prices. If we can't fix it, there's no fee. There is a small minimum diagnostics fee for customer chooses not to go ahead with the repair.
