

Hand test sieve

Housing made of stainless steel, ISO 5223

Diameter 200 mm, effective height 25 mm

ISO 5223 defines the specifications for analytical sieves which are used for the determination of undesirable substances in grain samples. Analytical sieves with glued in perforated plates. There are not any cut perforations at the edge of the sieve. Length of the slits 20 mm

Analytical sieves according to ISO 5223

Article no.

available slit widths (long perforation):

1290 5040	1,00 mm	Fine sieve
1290 5060	1,80 mm	Rye
1290 5062	1,90 mm	Durum wheat
1290 5065	2,00 mm	Wheat
1290 5070	2,20 mm	Barley
1290 5075	2,50 mm	Brewing barley
1290 5067	2,80 mm	Brewing barley
1290 5090	3,55 mm	Chaff

available slit widths (round perforation):

1290 5208	0,50 mm	Rape
1290 5260	1,80 mm	
1290 5280	3,00 mm	Rape
1290 5295	4,50 mm	Maize
1290 5005	Cover	
1290 5010	Bottom
