

ACMELIGHT  COMPANY

## WELCOME

Welcome! Thank you for keeping this booklet in your hands. We are glad to introduce ourselves: we are competent cohesive team, fast-growing company AcmeLight. Our reputation is perfect and our business is constantly expanding. The world is always striving to the beauty and we are trying to help it. Our slogan is "Business, made on Beauty!"

## COMPANY HISTORY AND ALL ABOUT ITS COMPETENCE

Acmelight Company was not created on spot. First, there was a long investigation of modern market trends, segment selection and birth of idea. Then, the team of young and enthusiastic specialists was trying to turn this born idea into the present reality. In such a way, the know-how was born, the name of which is Glowing paints Acmelight. The date of company creation can be considered 2006 year, when the trade mark Acmelight was registered and luminous paints production was certified. We needed not only domestic, but also many foreign investments for expensive equipment and high-qualified raw materials, light-accumulating basis for our paints, before we achieved the present production rate.

At the present time Acmelight Company is the prospective and constantly growing business which attracts attention

of many Partners and Customers. "Business made on Beauty" is the slogan of our company, which has not been chosen occasionally. Our company deals with the development and manufacturing of luminous paints. Such notion as "luminous paint" is not very new for many people. But the know-how of our company is exactly in varieties and colour shades of luminous paints.

Currently Acmelight Company produces:

- 10 types of luminous paints, 9 different colours
- 5 types of fluorescent paints, 7 different colours.
- 4 types of invisible paints, 3 different colours, glowing in UV light.

It opens unlimited possibilities as for Acmelight paints application.

## CUSTOMERS AND PARTNERS OF COMPANY

Acmelight company deals not only with the production of interesting, modern and high-demand products, but presents wide possibilities for setting up and developing new profitable business due to it. It provokes the return response in different companies of CIS, Europe and all around the world. It is possible to divide luminous paints Acmelight into a few categories: paints for construction, advertising art, textile, for safety systems.

At the present time, our Clients and Partners are:

- Building companies of different branches – such as developers of living houses up to builders of mines and subways;
- Companies, dealing with production of advertising and printing products, including modern printing shops;

- Companies of military-industrial complex;

- Companies, dealing with interior design and architectural design.

The Dealer network is constantly creating and expanding. At the present time our company has representative offices in different regions of Ukraine, Russia, Kazakhstan, EU countries, namely in: Bulgaria, Poland, Germany, Slovenia, Italy, in Arabian states.

## PRODUCTS

Acmelight Company is specialized in production of luminous, fluorescent and invisible UV Light "club lighting" paints.

We produce:

- 10 types of Glow in the dark paints, 9 different colors. Such paints eliminate the light at the total darkness, without any lightening. As we use high-qualified Holland raw materials as the light-accumulating basis, luminous paints are able to eliminate the light not less than 10 hours. The light energy is accumulated both from the daylight and electrical one.
- 5 types of fluorescent paints, 7 different colors. These paints are very bright under the daylight, and it eliminates deep volumetric glowing under the UV "club" lightening. We have developed out and introduced to

production such paints, used not only for textile, flowers and glass, but also for wood, concrete and metal. That is why it opens really unlimited branches of its application. For those, who dreams about being the disco star, we have developed paints for body-art and 7 colors of fluorescent nail polishes.

- 4 types of invisible paints, 3 different colors, glowing in neon lightening. Such paints are completely invisible at the daylight, but it glows deeply under "neon" light. These paints are good for painting walls in night clubs, laser show halls, bowling clubs. We also produce 3 colors of "colorless" nail polishes and invisible paints for paper (for making watermarks), body, self-adhesive film, flowers and etc. The number and variety of paints Acmelight open unlimited potential for its application.

## OUR GOALS

Popularization of luminous paints, expansion of products range, development of new sales markets are our goals. We are trying to convey information about our products to each our potential Customer.
