

Take control of your warmth

Smart control of the CeraPro underfloor heating system will ensure comfort, reduce energy consumption, and save on running costs. These environmental and financial considerations mean the use of a control system is a responsible approach to energy management.

CeraPro is supported with a range of Raychem underfloor heating controls, including fully customisable on/off timer functions and economy settings to ensure only the heat needed is delivered to the room.

CeraPro is also compatible with Raychem's energy saving Isolecta tile insulation board which can improve heat up times up to 65% and reduce energy consumption up to 20%. This is a significant factor for warmth on-demand and running cost savings.

Total Care Warranty

Up to 20 years without worry with a different warranty concept

Quality products – installed and checked by a professional electrician – assure home owners the long lasting comfort of a warm floor. When installing Raychem underfloor heating systems, electricians can now offer a 12 Year Total Care Warranty to their customers.

The full support of a quality brand comes with it. Certified Pro installers can extend the Total Care Warranty to 20 years.

Total Care = doing what it takes to assure a warm floor

In the rare event that our product would fail and we cannot repair it, we will not only provide you with a new product and pay the costs of installing it, we will also take care that the floor covering is repaired or replaced to the equivalent standard.

For the complete information, download the Warranty Certificate and Registration form from www.raychemfloorheating.com.

Raychem®

CeraPro
Flexible electrical
underfloor heating

...for the home
Treat yourself to a luxurious comfortable warm floor

Raychem CeraPro: The comfortable, underfloor heating solution

The heat you need, always

Ordinary wall mounted radiators heat the air adjacent to their location. This heat rises and the further you are from the radiator, the less benefit you feel. **With CeraPro the room benefits from even warmth distribution and minimises temperature variations throughout the room.** The power output of the system can also be designed to deliver either subtle complimentary warmth or full room heating. Being a heating cable also means irregular shaped rooms can easily be designed.

Luxurious comfort in your home

Tiled floors make a wonderful addition to the home; practical, hard wearing and extremely hygienic. Such floor covering is becoming a strong design element in bathrooms, wet rooms, kitchens, and conservatories, contributing a contemporary aesthetic in modern home design. Adding warmth to this design feature is an affordable luxury with valuable benefits.

Walking on a warm tiled floor is a wonderful sensation. With CeraPro, when your feet are warm, your entire body feels warm and cosy. **CeraPro is also an invisible heat source, being installed directly into the tile adhesive.** There is no need to adjust existing floor heights to accommodate the heater.

5 good reasons to choose Raychem CeraPro

- 1 The affordable luxury of a warm floor!
- 2 The installation is simple, straightforward and fast. Ideal for renovation projects.
- 3 Increased flexibility, with the use of high grade polymers assuring excellent performance.
- 4 Ultrathin solution.
- 5 Total Care Warranty.

Clean the sub-floor

Prime the sub-floor

Measure out the required cable spacing

Apply double sided tape

Install the cable

Fix the cable with mesh

Install the tiles

CeraPro underfloor heating is appropriate for all tile floors
