5 FACTORS FOR SUCCESS

Flexibility

Being a mid-level company in Romania, we can easily adapt to our customers' transportation requirements. By flexibility in the trade relations, we organize shipments for companies in various industries (textiles and garments on hangers, consumer goods, electronics, Hi-Tech, personal care products, household, furniture, mechanical and spare parts).

Global Coverage

Through the ALPI Group, we have the support and collaboration of more than 200 correspondents worldwide. Thus, with MA.RA Logistics Quality you can transport goods to and from almost any part in the world.

Specialized Services

We are recognized today by a great number of garment manufacturers in Romania, as reliable partners in organizing the shipments of textiles and garments on hangers. Because we are passionate about what we do, we are constantly looking to consolidate such Specialized Services for other industries as well.

Relevant Experience

To guarantee the satisfaction of our customers, MARA Quality Logistics, with an experience of over 20 years, develops permanent resources, knowledge and skills in the field of Transport and international shipping.

Cost Advantage

Having strong partnerships with vendors, carriers and other service providers, we can guarantee our prices are competitive. We offer also a big storage space, heated and with air condition, to store your goods safe and organized even for longer period of time.

The Integrated Management System

Protecting our position as outstanding provider of ***national and international freight transport, storing and handling services***, is a boldly goal to us, considering that our objective is to undertake our business in accountable manner as to the environment, civil society and employees.

For the achievement of such desideratum, we always bear in mind:

- satisfaction of our customers;
- promptitude in delivery of services;
- compliance with the legal provisions and other industry applicable requirements;
- employees' involvement and motivation;
- low costs of services, ensuring:
- pollution prevention;
- reduction of the environmental impact of our business;
- prevention of occupational accidents and illnesses.

Therefore, we decided to implement and maintain an Integrated Management System, in conformity with ***ISO 9001:2008*** and ***ISO 14001:2005*** and ***SR OHSAS 18001:2008***, aiming at incessant improvement of the organisation's performances.

Safe and Secure

As the security is an important factor, an **alarm system** has been installed to protect the entire property against intrusions, and all the goods held in the warehouse are always controlled by a video surveillance system which, also guarantees also the carrying of goods on-loading and off-loading.

We are using the following **systems and methods** for safety and security:

- Personal badge for access control in every room
- Intrusion detection system - 24/24 hours
- Emergency alert - 24/24 hours
- Fire alarm system
- High resolution CCTV camera system - digital video surveillance 24/24 hours
- Access in the logistic park controlled by security company 24/24 hours
- Supervised parking place

Observing the company security policy, many **security system guidelines** have been introduced into our warehouse. The input is controlled by an emergency alert software which instantly broadcasts evacuation and other urgent messages immediately.

The emergency broadcasts are delivered to each sector and room of the warehouses. The access control and all security systems are managed by corporate security and local private security company.

Our CCTV monitoring system supplies - on request to corporate security - insurance company information loss, damage and for any internal and external official investigation.
