

METALFLUID

METALFLUID

DESCRIPTION

High quality lubricant for the lubrication of metal casts when the surface of concrete is required to be very smooth. It protects the metal casts against corrosion. It contains special additives of accretion of surfaces.

APPLICATION

METALFLUID is a special lubricant for use on metal casts (special forms for concrete shaping). The oil can be applied on metal casts by brush or by spraying.

PROPERTIES – BENEFITS

PROPERTIES	BENEFITS
Excellent protection of metal casts from corrosion	Economy of time and working
Absolute smoothing of concrete's surface.	Clean concrete without fractures and patches.
