ILPRA S.p.A. The company

ILPRA S.p.A. is a Company which has worked in the packaging machine sector for more than 50 years. The experience achieved, the high degree of quality reached by our machines, the success obtained in the home market encouraged us to study and realize the best way to propose ourselves in the foreign countries.

Today this makes of ILPRA one of the European and worldwide leaders in the packaging sector. Due to our organization of production we are happy to be able to say that we produce all the components used in our machines on site. This complete control of the manufacturing process allows us to guarantee the highest quality. We have been collaborating with the most appreciated Food Companies in the world (Coca Cola, Parmalat, Unilever, Nestlé, Yomo).

The electrical, electronical and pneumatical components have chosen between the most important international suppliers (Festo, Bush, ect.)

The components of ILPRA packaging lines are rigorously controlled during the manufacture and all parameters are tested. This allows us the full acceptance even of the European specifications in matter of constructive standards, production efficacy and safety requirements.

Our offices

SERVICE and SPARE PARTS

We offer a **quick and qualified TECHNICAL SERVICE** and this is the obligation that ILPRA assumes with his customers at the moment of a machine delivery. We totally and actively engage ourselves in a process of continuous improvement for the attainment of higher objective of quality. Our proposal is to give to our customer a high quality product which has to be able to satisfy the demands of quality and positive assurance with a competitive price.

Our actual standard production is divided into the following machine series:

Food Pack - it allows the packaging of various products in thermoplastic trays to be closed by heat sealing film in reel. Each model can be equipped by a device to work either in vacuum or in modified atmosphere by the creation of vacuum and the introduction of a gas mixture inside the tray. This equipment could be offer to producers of fish, meat, ready meals, fresh cheese, fresh pasta and vegetables.

Foodpack Speedy mechanical

Form Pack - for packaging by thermoforming, the machines of this range can work either with flexible or rigid material. Since they are strongly customized, it is possible to obtain a lot of different tray shape and sizes, suitable for various customers' requirements. All models are equipped with quick change-over system, able to work in aggressive environments, conceived for medium/high production.

Formpack F3 mechanical

Fill Seal - it represents the alternative to the complex and onerous foreign lines of packaging in the milk-dairy sector, specifically in the yoghurt production. The machine can work with all kinds of doughy or liquid products (fruit juice, processed cheese, cottage cheese, jam, etc.). If needed the product can be hot filled. The serie covers a wide range of productions, from the smallest ones to the largest dairy plants.

Fill Seal 4000

Seal Box - whenever is needed a thermosealing closure on special containers, having an improper sealing rim, like jars, or made of material not stiff. We can provide from a very simple sealing head, also possible to be fitted on an existing line, or a complete automatic machine with a star-wheel table.

ILPRA provides innovative solutions for non-food packaging especially for make up and "blister" products, these machines usually seal a plastic shell on a card board or aluminium foil.

Seal Box star-wheel table

Each series is composed by 7-8 main models, which are ranging from the smallest manual machine to the biggest automatic line. For this reason ILPRA is now really able to supply the widest range of packaging machines in Europe.

The materials we used in the machines manufacturing are stainless steel and anodised aluminium in order to guarantee a good quality and our system of mass production allow us to have very competitive prices and short deliveries.

The ILPRA Group comprehends also **Tecnopack s.r.l.** that supplies packing films and **Tecnofood-pack S.p.A** that supplies trays.

We remain at your complete disposal for any information you may need.
