

Pneumatic Comparator

HX673A Pneumatic Comparator

Product Description

HX673A Pneumatic Comparator is made up of lead screw, relieve valve, reverse valve, and output interface. It features high sealed Performance, stable pressure generating and simple operation. It is suitable in the laboratory and fieldwork.

It could supply the pressure for the calibrating pressure (differential pressure) transmitter, precision pressure Gauge, general pressure gauge and other pressure instruments.

Functions

HX673A provides pressure to calibrating pressure gauges, as pressure (different pressure) transducers, precision pressure gauges, general pressure gauges and other pressure gauge.

Characteristics

- ◆ Food grade stainless steel, hermetic technology in the military industry.
- ◆ Built in air oil separator could discharge the greasy dirt of the inspected instrument.
- ◆ High accuracy;simple operation;convenient maintenance.
- ◆ No external pipeline, avoid of the outer environment changing influence.

Technical Specification

Pressure Range	(-0.98~60)bar
Stability	0.05%F.S
Working Media	air
Output Interface	M20×1.5Female
Overall Dimensions	(L×W×H):325×210×170mm
Weight	4.5kg
