

COMPOZIT

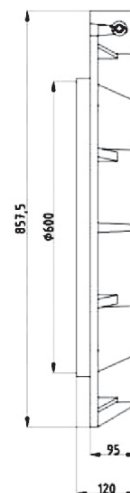

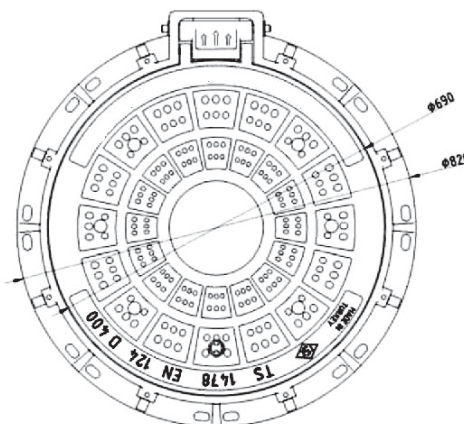

Materialul compus din două sau mai multe elemente e clasificat ca fiind COMPOZIT. Avantajul acestui material este acela că proprietățile unice ale mai multor materiale pot fi combinate pentru a obține un material "hibrid" mai bun, care posedă calitățile fiecăreia.

Produsele Selena Solution sunt fabricate prin tehnologia de termoformare folosind compusi de poliester nesaturati cu armătură din fibră de sticlă.

AVANTAJE

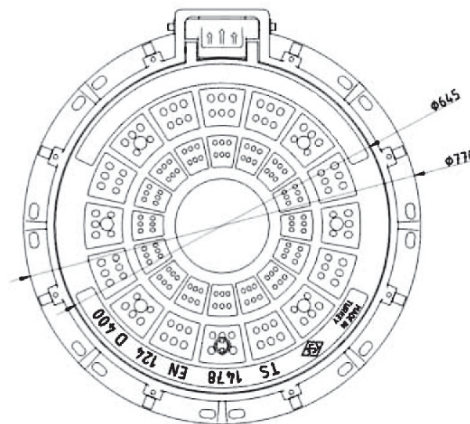

- Materiale reciclabile fara valoare comercială
