For Human Life **HUrom**[®]
SLOW JUICER

The New Paradigm in Juicers

Nature's taste and nutrition that
only live fruit and vegetable can deliver

Innovative
Juicing **36**
Solutions for Years

You can see the difference!

How is it possible to get such different results from same tomato?

The answer is the difference between the low speed extraction versus high speed grinding!
With the low speed extraction, more juice is squeezed out and less waste produced.

Traditional Juicer vs Hurom SlowJuicer

The Nutritional Content!

HUROM is the only true well-being juicer as it keeps more of the nutrients and enzymes.

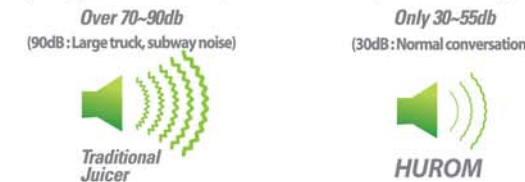

More Vitamin C!

HUROM slowly and gently presses out the juice-keeping more of the vitamin C alive and well. Get all of nature's nutrition!

Quiet Operation!

Unlike traditional juicers, HUROM is whisper quiet even under heavy usage due to its low speed motor that squeezes out the juice.

The Amount Extracted!

Why only extract half of the juice- Get all of the juice with a HUROM.

Hurom SlowJuicer is...

Convenient

It can make several servings without stopping.

Flexible

It can make just about any juice one desires.

Economical

It extracts much more juice than traditional juicers.

Timesaving

Substitute a meal with a big glass of nutritious juice.

A perfect combination of innovative technology and advanced engineering

Our innovative LSTS technology and user centered design set a new standard. Check with your own eyes! HUROM SlowJuicer innovative technology sets the new standard for juicers.

For Human Life **HUROM**
SLOW JUICER

Low Speed Technology System (LSTS)

The Hurom is patented Low Speed Technology System. The Hurom slowly and gently presses out the juice keeping more of the super nutritious enzymes, minerals, vitamins and favors alive and well.

LSTS has patent applications in 40 countries including the USA, the EU, Japan, China, Brazil, etc.

Innovative
Juicing **36**
Solutions for Years

It does more harm than good if you grind fruits in a mixer and drink it!

— British Medical Association

Grinding or chopping destroys much of the nutrition in juice.

Which juice do you want to drink Hurom SlowJuicer maintains nature's taste, fragrance and natural color and nutrition as it is.

Blenders

First the high-speed blades rip apart nutrients and enzymes and then heat from the motor and friction continues to destroy nutrition. Further, air is mixed into the juice causing it to oxidize faster.

Traditional Juicers

They also have high-speed blades that rip apart the nutrients and enzymes destroying nutrition.

Hand Graters

Also maintain most of the natural nutrition and taste—but is simply too time consuming and difficult.

Hurom SlowJuicer

Because Hurom presses out the juice most of the natural nutrition and taste is maintained.

Benefit's of HUROM

Innovative
Juicing
Solutions for **36** Years

For Human Life **HUROM**
SLOW JUICER

Low Speed Juicing for Maximum Nutrition and Taste

The Hurom unique Low Speed Technology System(LSTS) extracts maximum nutrients and flavor from fruit, vegetables and leafy greens.

Live, Nutritious Juice

The Hurom slowly and gently presses out the juice—keeping more of the super nutritious enzymes, minerals and vitamins alive and well. Get all of nature's nutrition from fruits, veggies, nuts & legumes!

Low-noise Operation

Minimize the noise by squeezing slowly rather than grinding with fast speed.

Quick and Easy Self-cleaning

Easy Cleaning fuction : Spining brush which located inside of the bowl cleans the surface of the strainer. It cleans itself automatically.

Continuous Extraction System

The Hurom automatically ejects all of the peel and pulp as it juices—letting you enjoy a constant flow of pure juice without the inconvenience of stopping to remove blockages.

All the nutrients which soy milk contains will help prevent from all sorts of modern diseases.

Mixture of soy and vegetable or fruit will even enhance the nutrients and that's why it becomes a must have juice in today's modern world.
